POLICY DOCUMENT ON ENVIRONMENT AND ENERGY USAGE

With Effect from: 12/10/2017

As per the resolution taken in 21st governing body meeting dated on 07/10/2017 with regard to the proposal of a policy in environmental and energy usage. The Environment and Energy usage Policy of Aditya College of Engineering & Technology –Surampalem uses energy in a systematic way so as to minimize its impact on the environmental issues.

PURPOSE OF THE POLICY:

Our policy denotes to explore the renewable energy resources and to diminish the burden and to search out substitute natural resources as solutions to the energy disasters and crisis. This environment and energy policy is compulsory for all the components of our institution and it applies to all its stakeholders and to the numerous activities commenced by the institution. It helps us to set in efficiency and environmental awareness in our daily activities, thus helps us to recognize our responsibilities and commitment to preservation of natural resources and to limit its usage. The Environmental Club is an official platform among our campus dedicated to the basis of educating the people and pupil in environmental awareness, to commence green initiatives, and to conduct various clean and green programmes to save energy and to protect the environment.

FEATURES OF THE POLICY:

- To evaluate the consumption of energy and to measure its influence on the environment.
- To analyse CO₂ emissions produced by our vehicles-transportations.
- To diminish air pollution emissions in the campus by using environment-friendly Vehicles (Battery vehicles), including bicycles, public transportation and use of pedestrian friendly roads.
- To set up solar panels to generate alternate energy.
- To utilise LED bulbs in the whole campus to save energy.
- To advance organised waste management mechanism.
- To develop rain water harvesting unit.
- To conduct tree plantation drives often.
- To take supplementary methods to unremittingly to look after our energy consumption.
- To confirm the accessibility of required resources to attain our aims.
- To motivate the usage of advanced technology to reduce energy consumption, atmospheric emissions and sound pollution, especially from our vehicle convoys.
